Installation Instructions

330.376.0889 | www.planetdds.com

DB-Install-041221

1	<u>Download this DataGrabber trial file</u> to the practice server. (https://www.apteryxware.com/files/updates/datagrabber/DataGrabberInstaller.exe)					
2	On the server, run the downloaded file from Step 1 as an administrator. Accept all default settings, unless specifically understanding and choosing otherwise. Take note of the installation path. Example: C:/Program Files (x86)/Apteryx Imaging/DataGrabber/					
3	Navigate to our <u>product updates page</u> and grab 3 things: 1) Under DataGrabber and OEM Versions, download the most recent upgrader of DataGrabber.					
	DataGrabber and OEM Versions					
	2) Under Practice Management Bridges (DataDrills) , download the link to the Practice Management Software that you will be using (you can see what Practice Management Software we support in <u>this article</u>).					
	Practice Management Bridges (DataDrills)					
	3) Under Imaging Bridges (Launched Applications), download the link to the Imaging Software that you will be using [if using XVCapture/XVWeb, only the XVWeb link is necessary] (you can see what Imaging Soft-ware we support in <u>this article</u>).					
	Imaging Bridges (Launched Applications)					
4	On the server, run all three downloaded files from Step 3 as administrator. Point each upgrader to the DataGrabber installation folder from Step 2. Each upgrader should finish stating "# file(s) successfully upgraded - No errors." Example: 1 file(s) successfully upgraded No errors.

On each workstation, open Windows Explorer and navigate to the DataGrabber shared network path from the end of **Step 5**. Double-click on **DataGrabber.exe** to launch the program. A window should populate, asking if you want DataGrabber to automatically start with Windows, click on **Yes**. Then drag the **DG** icon from the hidden taskbar tray by the clock down to the visible icons to make DataGrabber always visible.

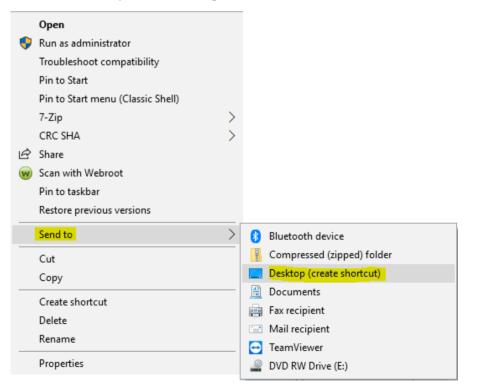

8

7

OPTIONAL

Right-click on **DataGrabber.exe** and select **Send to > Desktop (Create Shortcut)**. This allows for easy reinitializing of DataGrabber should the software crash for any reason.
